SUMMARY

I am a research-driven AI/ML student focused on developing practical intelligent systems using Reinforcement Learning, Computer Vision, and Generative AI to solve real-world problems.

EXPERIENCE

AI Automation Engineer Intern – NGO Kshitij

6 months | 2025

- Developed an AI personality-analysis platform automating weekly behavioural evaluation for 1000+ students.
- Replaced manual assessment with a CSV-driven workflow and generated structured reports for programme directors.

PROJECTS

BehaveFinRL

- Developed a behavioural finance trading agent using PPO, Prospect Theory, HMM regime detection, and KernelSHAP to improve decision-making through risk-aware reinforcement learning and explainable predictions.

Spatial AI Digital Twin

- Built a Spatial AI digital twin that combines pose estimation, activity recognition, and reinforcement learning to detect unsafe worker behaviours and support Industry 5.0 safety monitoring.

Krishi Saarthi

- Designed a voice-first rural commerce platform using IndicWhisper, Hindi NLP, and SMS/USSD fallback to enable digital marketplace access for users with limited literacy and connectivity.

Financial Awareness Chatbot

- Developed an AI-powered financial awareness chatbot that provides fraud prevention guidance and secure digital banking assistance through natural language conversations.

Plant Disease Detection System

- Built a CNN-based plant disease detection system for crop health monitoring, resulting in a published Indian patent for automated image-based disease classification.

TECHNICAL SKILLS

Programming: Python, Java, C, JavaScript, SQL

AI/ML: PyTorch, TensorFlow, RL, NLP, CV, GenAI, Stable-Baselines3, SHAP

Web: Flask, React, Node.js, Express.js, Flutter

Database: MySQL, MongoDB

Data: Pandas, NumPy, Matplotlib, HMM

PATENT & PUBLICATION

System and Method for Automated Plant Disease Detection Using Deep Learning Image Classification — Indian Patent Office, December 2025.

EDUCATION

Symbiosis Institute of Technology, Pune

B.Tech Artificial Intelligence & Machine Learning

2023–2027

CGPA: 6.5

Symbiosis Institute of Business Management, Pune

Diploma in Business Management

2025–2026

CGPA: 5.8

ACHIEVEMENTS

150+ DSA problems solved • YUKTI/IIC Regional Meet Selection • NASA Space Apps Challenge 2025 Semi-Finalist • HACK x ACM 2025 Finalist • 97% in CBSE Computer Science

CERTIFICATIONS

Generative Adversarial Networks (DeepLearning.AI) • IoT & Robotics (Corizo) • Stock Market Trading (Internshala) • SQL for Data Science (Great Learning)
